**Final Project Progress Report - Due**

Oct 19, 2025 11:59 PM

**○ Fa25 CS 250-01 Algorithms and Problem Solving II**

I assume you have been working on your final project since submitting your proposal. Therefore, this assignment is designed to help me track your project progress and identify and resolve any issues/problems as early as possible.

You need to submit a document to express the following requirements:

1. **Name your report:** i.e., <Your Project Title> project progress report
2. **Project status:** currently on track, at risk, or off track; you can also estimate the percentage of work done out of the total work
3. **Project report summary:** Write 2-3 sentences that briefly summarize what you have done so far
4. **Project milestones:** List and explain more details about what you have done, what you are working on, and future works in chronological order, i.e., UML design, class A design, code class A, B, etc.). You can attach date-time (start, finish, etc.) to each milestone. Additionally, you can also note the completion rate and the remaining % for each milestone.
5. **Issues / Problems:** Describe any issues or problems you have so far
6. Attach your current version of your final project if possible. I can review your application and give you feedback.

**Final Project Progress Report**

Due October 19 at 11:59 PM

Starts Oct 14, 2025 11:00 AM Ends Oct 22, 2025 11:59 PM
